

## Contribution to Climate Protection

07.07.2022

### FEUERBÄNDIGER DANNY SECK

Offsetting for 4.8 t CO<sub>2</sub>  
with a value of EUR 135.00

Donation of EUR 8.00

#### **This contribution to climate protection is having a real impact!**

One third of your emissions will be offset in an upland moor in Schleswig-Holstein and two thirds in a reforestation project in Nicaragua. Moors as well as forests store CO<sub>2</sub> as natural sinks and thus contribute to climate protection. Thus the rewetting of the Königsmoors does not only store CO<sub>2</sub> in the soil. Flood protection, water pollution control, microclimate and biodiversity are also improved and promoted. Whereas the project in Nicaragua supports small-scale farmers reforesting unused sections of their land with native species.
